Mr. John Osborn	(3) General Services Administration/FPS
Ms. Karen Brandt	(4) Administrative Specialist/DYNATREND

(1) Voting Member (2) Alternate (3) Observer (4) Support Contractor

Items covered:

Discussion of Government to Industry Briefing - September 23, 1985

The Steering Committee Chairman, addressed the progress of the Government to Industry Briefing which is scheduled for September 23, 1985 at the GS Auditorium, beginning 0800 hours. Correspondence have been forwarded to the IACSE subcommittee chairmen requesting their participation on a briefing panel, which will address Industry on their agencies plans, programs and operational requirements for Security Equipments, under each discipline. This briefing will provide a clearer view of the Government's requirements for Industry in generating more informative papers at the FY'86 IACSE/ADPA Symposium, as well as a more effective use of IR&D funds in Industry.

*Incl (2)*

It was requested, that the subcommittee chairmen submit their briefing outline by the next Steering Committee meeting, August 8, 1985, to assure dissemination of same at the briefing.

An awards dinner sponsored by the American Defense Preparedness Association (ADPA) will take place the evening of the briefing at Fort Myers Officers Club, in the ballroom, with a charge of \$25.00 per person.

The IACSE Steering Committee nominated the following persons to receive an American Defense Preparedness Association award for distinguished services. Those nominated were General Stillwell, (Ret), until recently, Under Secretary of Defense, and Congressman Hal Rogers, of Kentucky. The attendees unanimously endorsed this nomination (with one abstention). However, in verifying the participation of the nominees, Congressman Hal Rogers will be unable to attend and General Stillwell will confirm his availability on or about July 21, 1985.

#### Report on FY'86 Initiatives - Supplemental Funding

Mr. Clement was advised by Lt. Col Swanson, Department of Defense/OUSDRE, that the FY'85 supplemental has been transferred to the GSA finance office. This supplemental will permit IACSE to proceed with the Master Program Plan for FY'85 and begin line items for FY'86.

#### Report on FY'86 Options of Technical Symposium's Location

Jim Owens, Department of Defense, Belvoir, R&D, submitted a report on his evaluation of the IACSE's location option for the FY'86 Technical Symposium. Mr. Owens addressed fourteen sites which could accommodate the symposium. The committee selected Eglin Air Force Base, Florida and Langley Air Force Base, Virginia Beach, for consideration. A new pavillion has been erected at Virginia Beach which will accommodate consecutive classified sessions. Mr. Owens suggested in the event we do utilize the Virginia Beach Pavillion, the symposium be held in late April or early May. The Steering Committee Chairman requested a vote of the attending Full Committee members, the outcome was seven votes for Virginia Beach and five votes for Eglin. The above evaluation will be discussed at the next Steering Committee meeting and a final recommendation will be made.

#### Subcommittee Reports:

##### Containers/Vaults/Locking Devices

Phase two funding is underway for data gathering of the Department of State's Lock Research Program. Mr. Jeffrey Schatz, FSS, is working with the subcommittee to establish testing procedures. General Service Administration has had a contract with a testing contractor which has lapsed; Mr. Schatz has been working toward the renewal of this contract, however, delay problems exist. Mr. Clement was asked to solicit the Chairman's assistance in expediting the renewal of the testing contract and data gathering.

### Barriers (Interior, Exterior, Ballistic)

Mr. John Wolf, U.S. Department of State who was currently on the Barriers Subcommittee, has been reassigned to a new position and will be unable to serve on the above subcommittee. Mr. Richard Roberts will assume Mr. Wolf's position on the Barriers Subcommittee. The IACSE wishes Mr. Wolf much success in his future endeavors, and welcomes Mr. Roberts to the subcommittee.

### Intrusion Detection (Sensors, Command, Control Display)

No report. (Minutes of June '85 Subcommittee meeting was distributed to all members).

### Law Enforcement Patrol/Guard Equipment

A contract was awarded from GSA for a pilot program, Security Monitoring and Reporting System (SMARS), which was designed to monitor the contract guard security operations and the given whereabouts and safety of contract patrol guards, at any given time/location in a prescribed area. This system is not only a guard monitoring system but also keeps track of hours and allows for rapid confirmation of submitted invoices for service. GSA has experienced overpayments for contract patrol guard services. The first program review is scheduled for 18 July 1985. If any IACSE member is interested in receiving a copy of the procurement specs and statement of work, please contact Mr. Richard E. Clement, General Services Administration.

### New Subcommittee Chairman - Acceptance of Nomination

The following nominees have accepted the co-chairmen position of the new IACSE subcommittees: Terms/Definitions/Symbols - Mr. Eugene Epperly and Lt. Col. Richard Swanson, Department of Defense, Office of the Under Secretary; and Mr. Jeffrey Schatz and Mr. Walter Eckbreth, Federal Supply Services/GSA, to co-chair the Physical Security Equipment Categorization subcommittee. The nominations were endorsed by the full committee members. Mr. Edward Teets, Department of Justice, had to decline his nomination for the Independent Lab Certification subcommittee, therefore, the IACSE would appreciate nominations for the above mentioned subcommittee.

### Nomination Committee - Selection of

The Steering Committee Chairman expressed a need for a nominations subcommittee. The nominating committee will select distinguished persons who have demonstrated significant contributions to the progress of technology in the physical security equipment arena, as well as have screening responsibility of technical papers to be presented at the Spring Technical Symposium.

The Steering Committee will address nominations at the next IACSE Steering Committee meeting.

Addressing Blast Damage Effects of Government Buildings

Mr. Harvey Pryor, Chairman, IACSE requested a need for the IACSE to look at ways by which Government Buildings (military and non-military) can possibly minimize blast damage effects thru the use of ablative and energy absorbant barriers which could be affixed to buildings and other assets to be protected. Mr. Clement, Steering Committee Chairman, believes the Barrier Subcommittee should address this problem. Although other agencies have research this problem, Mr. Clement requested FEMA reports referencing blast damage effects. Mr. Calvin Byrd, FEMA, volunteered to research FEMA's findings and forward a report. Mr. Jim Ownes will contact Port Huemene in reference to their Barriers research, for input. Any information, research papers, or findings on the above subject, will be appreciated at the earliest date.

IACSE Master Membership List - Confirmation of

Three copies of the IACSE Master Membership List were provided for confirmation of each member's title, agency, address and telephone number. In the event a member was unable to attend the Full Committee Meeting, it would be appreciated if you would forward any changes referencing the above, to Ms. Karen Brandt, IACSE Administrative Coordinator, 1911 North Fort Myer Drive, Suite 907, Arlington, Virginia 22209.

The Full Committee Meeting was adjourned at 11:00 A.M.

  
Harvey E. Pryor  
Chairman
